**Cliff Path Safety Code**

1. **Keep to the official path**, away from cliff edges and overhangs.
2. Always supervise children, especially near cliff edges.
3. Be aware that weather conditions can change suddenly. Strong onshore wind can suddenly change to off-shore as the wind eddies on the higher sections of the cliff. Heavy fog is common and results in extremely poor visibility.
4. Apply the principles of **Leave No Trace** and **The Burren Code** by being well prepared for your walk, following trail notices, taking home your rubbish and minimizing your impact on the environment.
